- Adobe premiere pro cc, Adobe After effects, Vs Code, IntelliJ

### Soft skills

- Patient and Hard-working, Will go extra mile for meeting expectations
- Adaptability/flexibility to changes
- Good listener and Ability to accept feedback

## Experience

### Coviam/Quinbay Technologies

SOFTWARE DEVELOPMENT ENGINEER

Bangalore, Karnataka

Jan 2020 - present

- Quinbay works with an e-commerce giant based in Indonesia, Blibli.com. My role in organization is to improve customer experience and their journey while they are looking for a product online. I work as front-end developer here. Tech stack we use here is VueJs, Java Springboot, Solr and Kafka for messaging.
- I have worked on some vital features on website like implementing infinite-scroll, improving website performance by implementing lazy-loading and memoization. While developing those features, I follow good coding practice, writing unit test cases and optimizations are always taken into consideration. Due to my dedication and consistency of delivering quality tasks, I have been awarded with SPOT award twice in a span of only one year.
- I have worked on some projects here, in one of those projects, I led a team of 4 people on developing a Content Management System for Team and business users. My role was to manage the team, decide who will work on which feature based on their skill set and also work on developing some crucial features for the same. We were the only team in entire organization at that time who has worked on Vue3 which was very new during that time.
- In Oct-2020, management at Coviam has decided to split the entities for smoother operations and management. So a new entity named as Quinbay was developed.

## Planet Tech Labs

FRONT-END DEVELOPER & UI DESIGNER

- Designed mock-up screens in Adobe XD.
- Implemented mock-up screens using React and Material-UI.
- Guide: Sanket Karve

Ahmedabad, Gujarat

May 2019 - Jul. 2019

- Designed Screens for mobile app of company using Adobe photoshop.
- Guide: Mikul Patel (Co-Founder MoodCafe INDIA)

Ahmedabad, Gujarat

May 2019 - Jun. 2019

# Projects

---

## Personal Portfolio

WEBSITE TO SHOWCASE MY WORK

Aug 2021 - 3 Days

- Many times I learn something new and as part of that I develop a project or something. I wanted to showcase that work. So, I manage this website to upload my work. It has Testimonials, my skill sets and my latest resume to download.
- Tech stack: HTML, CSS and JS
- Link: [Chirag Modi](#)

## Tech blogs

WEBSITE TO UPLOAD BLOGS

Aug 2021 - 10 Days

- As a part of learning NextJS, to understand it better I started creating a personal blog website. Where I upload different articles which i like from different places on website. Website has functionality to show featured posts and all-posts. Featured posts are those which are more likely to get visitors attention.
- Tech stack: ReactJS + NextJS
- Link: [Tech blogs](#)

## Amazon Prime Clone

A STATIC VIDEO STREAMING WEBSITE CLONE

May 2020 - 5 Days

- I tried to design a Amazon Prime's clone to learn VueJs better. It is made using VueJs and I used firebase for hosting on website. It was developed to learn how to divide a page into components and visualise the separate sections on a web page.
- Functionalities: You can search for a show. You can't go to show page until you are successfully logged in. I have used an auth-guard for preventing that. I have also made separate show page for each show. There are recommendations also shown on page.
- Link: [Amazon Prime](#)

## Slack Clone

Team size - 1

CHATTING WITH FRIENDS SECURELY

Apr 2020 - 10 Days

- I tried to design a slack clone which can be used to send messages and also has notification alert feature. It also has functionality of adding to-do item. So you can have your to-do list in side to view. You can create new channel and use it to communicate with existing users. Website is made using ReactJs for front-end side and for back-end i have used Firebase from google. Although it is not responsive.

## Question Paper Generator

Team size - 8

GENERATES A QUESTION PAPER BASED ON YOUR PREFERENCE

Jan. 2019 - Apr. 2019

- A website for university/colleges/tuition classes/ personal teachers to add questions to their library.
- User can remove/edit the question and also multiple user can share a same public library.
- Faculty's can also share private libraries to each other in case when a course's faculty changes
- Guide: Prof. Saurabh Tiwari

## Database Management System

Team size - 4

HEALTH CARE DBMS

Aug. 2018 - Nov. 2018

- A database which stores different types of diseases, their symptoms, causes and remedies.
- It also stores awareness program details for different diseases which are going to be organised or had been organized in past state wise.
- It also stores epidemics spread over the years in different regions. All this data will be stored country wise.
- Guide: Prof. P M Jat
